

This is the world we are working towards,  
and it's nearer than it might seem.

- 1 Electronics become heirlooms with extended software support
- 2 Schools teach repairs and upgrades
- 3 Personal ownership and investment in our e-stuff
- 4 Open hardware and 3D printing of spare parts
- 5 Sharing of skills locally
- 6 Repair is visible, easy, everywhere
- 7 Design education promotes upgradable, lasting products
- 8 Popular rejection of throw-away products
- 9 Move beyond recycling to resource efficiency
- 10 All material loops closed including carbon and water
